

Front-End Programs “Your Project Name”

Task - 2

Front-End Programs

- Front-end programs for Calculator and Text-editor is made.

LMS Username	Name	Batch
2113a53210	ABDUL AZEES M	8

Task - 2

Create various Front End Programs

- Draw and design a uniform front end code for calculator
- Draw and design a interactive front end code for text-editor

Evaluation Metric:

- 100% Completion of the above tasks

Learning Outcome

- Get to know about concepts of project bucketing
- Knowing about various frontend development framework like angular, vue,react
- Know about various react topics like components, props, state, life cycle etc.

Step-Wise Description

- Determine the purpose and scope of the program.
- Design the user interface.
- Develop the front-end code.
- Test and debug the program.
- Deploy the program.

Summary of your task

To create a front-end program, one needs to follow a five-step procedure. Firstly, the purpose and scope of the program need to be determined. Secondly, the user interface of the program needs to be designed. Thirdly, the front-end code needs to be developed using programming languages such as HTML, CSS, and JavaScript. Fourthly, the program needs to be tested and debugged to ensure its proper functioning. Finally, the program needs to be deployed on the target platform. The program needs to be regularly maintained and updated to ensure its continued functionality and relevance.
